PROFESSIONAL SUMMARY

Final-year B.E. student in Artificial Intelligence and Machine Learning with experience in software development, backend engineering, data analysis, and machine learning. Skilled in building scalable applications using Python, Django, FastAPI, SQL, Git, and REST APIs. Strong analytical and problem-solving skills with a focus on developing reliable, user-centric software solutions.

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, HTML/CSS

Frameworks & Tools: FastAPI, SQLAlchemy, Django, TypeScript, React.js, REST APIs, Swagger

Databases: MongoDB, PostgreSQL

Devops Tools: Docker, GitHub, Git, VS Code, AWS, Vercel, Render

Concepts: API Testing, OOPs, DSA, Database Design, Machine Learning

EXPERIENCE

Manipal Institute of Technology

Feb 2026 – present

ML Research Intern, Advanced Process Control Lab (ML)

Manipal, India

- Working on ML-driven research involving preprocessing, analytics, simulation workflows, and model experimentation for control processing methodologies.
- Conducted extensive literature reviews, analyzed research papers, and contributed to technical reports and research discussions.
- Collaborated in a research-oriented team environment using Python and ML libraries for dataset analysis and experimentation.
- Presented experimental methodologies and implementation results for technical review by IISc Professor Dr. Radhakant Padhi.

PROJECTS

SmartStock AI | *Django, Python, Machine Learning, MySQL, XAI - 2025-2026*

GitHub — Live Demo

- Developed an AI-powered inventory management system using Django and Machine Learning to forecast demand and automate inventory recommendations.
- Implemented Explainable AI (XAI) for transparent prediction insights and intelligent reorder suggestions.
- Built interactive dashboards with real-time inventory analytics, demand trends, and stock alerts.

JobSphere | *FastAPI, React, TypeScript, PostgreSQL, SQLAlchemy, JWT - 2026*

GitHub — Live Demo

- Built RESTful APIs using FastAPI and SQLAlchemy to manage companies and job listings with complete CRUD operations.
- Implemented JWT-based authentication and authorization, allowing Admin/HR users to manage data while providing read-only access to general users.
- Designed a responsive React + TypeScript frontend integrated with a PostgreSQL database and deployed the application for public access.

ACHIEVEMENTS

- Developed multiple production-oriented AI and full-stack applications during hackathons and academic projects.
- Built AI-powered and full-stack applications using NLP, Machine Learning, FastAPI, and Django.
- Served as a Core Team Member in multiple college clubs, contributing to technical and event initiatives.

CERTIFICATIONS

- Google Cloud Skill Badge on Prompt Design in Vertex AI
- Prompt engineering, Issued by Cognitive class
- NPTEL- Joy of computing using python, Introduction to IOT.

EDUCATION

Alva's Institute of Engineering and Technology

Bachelor of Engineering (B.E) in Artificial Intelligence and Machine Learning — CGPA: 7.88/10

Sep 2023 – present

Mangalore, India

Alvas Pre-University College

Higher Secondary Certificate (Class XII) — Percentage: 90.5%

Apr 2021 – Jul 2023

Mangalore, India

Jnana Bodhini School

Secondary School Certificate (Class X) — Percentage: 93.44%

2020 – 2021

Pavagada, India
